

# Vannesa Kit

By James Clark

In this story I will be telling you about the kit Vannesa. With this kit you will be able to charge your bow shots to do a triple shot. I'll tell you about a round where I use this kit. I ran to my generator to get iron for an axe and wool. I broke the enemy bed and bought a bow and arrows. I built to the middle and shot a guy and killed him with a triple shot. I then went back to base, bought more arrows and some iron armor then went back to mid. I got 12 emeralds and bought a diamond sword and diamond armor. I DESTROYED the red team and green team. Blue left the game and yellow, orange, and pink all teamed up to kill me and then I shot them off the map. Then I broke their beds of them and killed them. My rating is not to OP only good if you have a good aim.
